# Smart Tableware Concept: sustainable, innovative, forward-looking

'The most sustainable answer for every situation' - that is our motivation: environmentally friendly alternatives to conventional disposable tableware that are not only practical but also sustainable.

Three strong concept orientations characterise our situation-specific tableware concept:

- EAT is **EATlery® = edible**  
Use cutlery, then eat up, no rubbish. One biscuit. Zero waste!
- COMPOST is **COMPOSTware® = naturally compostable**  
Use plates, organic waste bin or decompose in nature. Cradle-to-Cradle!
- REUSE is FRENVI **REuse® = reusable**  
Use the cup, bring it back, rinse it. The whole thing from the beginning!

# Flexibly combinable, environmentally friendly solutions for every requirement

Why is a combination of different product concepts 'smart'? Quite simply:

- **If reusable cutlery** is given out but not returned, there is no reuse.
- **If a reusable container** is reused 200 times, the higher ecological footprint of its production pays off.

If reusable containers are now handed out with edible cutlery, the cutlery is then eaten, the container is collected and returned, the situation is solved 'smartly' from various perspectives:

- **Smart innovation:** functionality paired with environmentally friendly materials.
- **Smart for the environment:** waste avoidance and resource conservation.
- **Smart in terms of costs:** Cost-saving purchase and disposal.
- **Smart for the customer:** Customised to your requirements and needs.

Environmentally and cost-conscious in every situation: **EAT, COMPOST** and **REUSE**. Mission accomplished.

**FREIVI**

eat | compost | reuse

# EATlery® - The Edible Cutlery from FRENVI

The cutlery is made from natural and renewable raw materials. The delicious taste **does not affect the taste of the food** and only unfolds after use.

- No waste, no returns, no rinsing = **Zero-Waste Mentality**
- **Best environmental balance** of all single-use plastic alternatives
- Dimensional stability between **15 and 60 minutes**
- 100% **vegan** and palm oil-free
- Corresponds to the **Circular Bio-Economy**

## Our Contribution to Climate Protection

More than 368 million tons of plastic waste are produced worldwide every year. The life cycle assessment table shows that **EATlery®** has the best environmental balance of all single-use plastic alternatives:

Production (per 1.000 kg Material)	Energy usage	Water usage	CO <sub>2</sub> emissions
Polypropylen (PP)	20.760 kWh	43.079 l	1.680 kg
Polystyrene fibre	25.070 kWh	172.780 l	2.530 kg
Bio-Plastic (PLA)	11.930 kWh	69.730 l	6.380 kg
Wood	9.520 kWh	15.300 l	2.000 kg
<b>EATlery®</b>	<b>4.600 kWh</b>	<b>12.000 l</b>	<b>1.270 kg</b>

- **EATlery®** consistently outperforms alternative materials in terms of CO<sub>2</sub>, water and energy consumption
- **Wood**, generally perceived as an “environmentally friendly material”, has a **negative impact** on the environment, especially in categories such as energy and CO<sub>2</sub> consumption
