WE ARE
BUILDING
A WORLD
WITHOUT
WASTE,
ONE CUP
AT A TIME.

“EMBRACING CIRCULARITY”

At **FREVI** we acknowledge circular bio economy as the only viable solution for living sustainably within our planet’s limits. Waste reduction and repurposing present both a challenge and an opportunity, contributing to a zero-waste future. In collaboration with our community, we aim to create a sustainable future rather than merely discussing it.

FRENVIS ADVANTAGE

Climate Friendly

Crop-residue used in our products reduces carbon footprint

Eliminate Waste

At the beginning and the end of product lifecycle

Supports Circularity

Resources can be reused and repurposed at end of their current product life-cycle

Safe & Hygienic

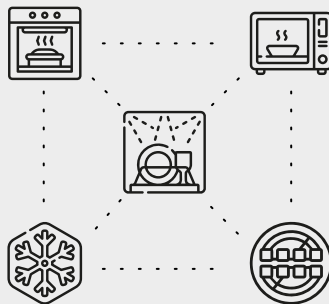

For food contact use free from formaldehyde, BPA, melamine & other toxic chemicals.

Durable

Non-breakable, suitable for hot and cold beverages

Contemporary Design

All natural shades & textures for that eha factor.

International Quality

Tested for USA FDA, EU LFGB contemporary design - and ISO

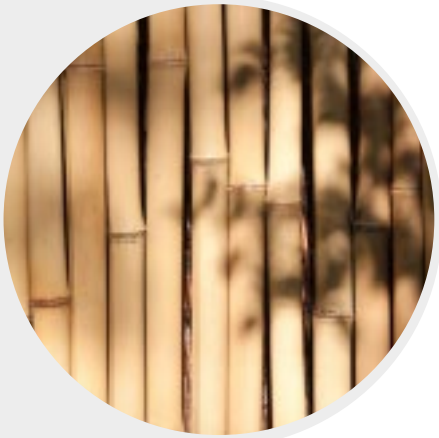

Color customization and logo printing can be done for bulk orders!

PRODUCTS MADE BY UPCYCLING CROP-WASTE

We prioritize the only planet we have: our earth!

Our unique products are crafted from sustainable biocomposites made with responsibly sourced crop residues like coffee husk, rice husk, rice straws, bamboo husk and more. Plus, they're all designed with circularity in mind.

"Nature's wonder material, **bamboo** grows incredibly fast, outpacing all other plants in CO₂ absorption. As strong as steel, it offers an eco-friendly alternative with the lowest carbon footprint when used in manufacturing of various products."

"The aroma of freshly brewed coffee is a sure way to start the day feeling energized. But it doesn't stop there. Thanks to innovative uses of **coffee husks**, you can enjoy your morning cup knowing it's a sustainable choice. It's a win-win for your health and the environment!"

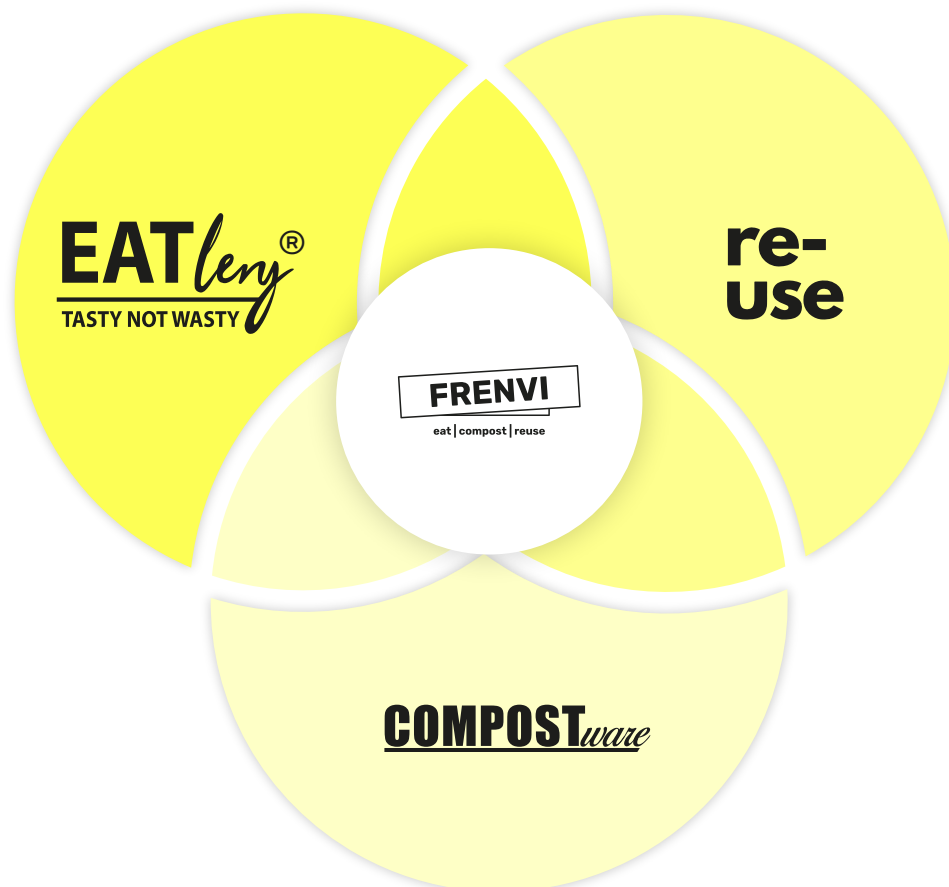

"**Rice**, a nutritious and widely consumed grain, is a global staple food. By using products made from rice husk and straw, we can help farmers avoid crop burning, a harmful practice for our planet."

Smart Tableware Concept: sustainable, innovative, forward-looking

'The most sustainable answer for every situation' - that is our motivation: environmentally friendly alternatives to conventional disposable tableware that are not only practical but also sustainable.

Three strong concept orientations characterise our situation-specific tableware concept:

- **EAT is EATlery® = edible**
Use cutlery, then eat up, no rubbish. One biscuit. Zero waste!
- **COMPOST is COMPOSTware® = naturally compostable**
Use plates, organic waste bin or decompose in nature. Cradle-to-Cradle!
- **REUSE is FRENVI Re-Use® = reusable**
Use the cup, bring it back, rinse it. The whole thing from the beginning!

Flexibly combinable, environmentally friendly solutions for every requirement

Why is a combination of different product concepts 'smart'? Quite simply:

- **If reusable cutlery** is given out but not returned, there is no reuse.
- **If a reusable container** is reused 200 times, the higher ecological footprint of its production pays off.

If reusable containers are now handed out with edible cutlery, the cutlery is then eaten, the container is collected and returned, the situation is solved 'smartly' from various perspectives:

- **Smart innovation:** functionality paired with environmentally friendly materials.
- **Smart for the environment:** waste avoidance and resource conservation.
- **Smart in terms of costs:** Cost-saving purchase and disposal.
- **Smart for the customer:** Customised to your requirements and needs.

Environmentally and cost-conscious in every situation: **EAT, COMPOST** and **REUSE**. Mission accomplished.
